PS# 08-54

8/24/08

On 8/24/08, at approximately 3:11A.M., uniformed officers stopped the offenders for investigation regarding an armed robbery that occurred earlier in the area of Broad and Thompson Streets. Both offenders fit the flash information that had been broadcast earlier. The officers ordered both offenders to get on the ground. Once on the ground, one offender began reaching into his waistband area. The officers told the offender, several times, not to move and to remove his hand. As the offender again reached to his waistband, the officer discharged his weapon, missing the offender; however, the offender was struck by a fragment and was transported to Saint Joseph's University Hospital. Recovered from the suspect was a black Pellet gun, which resembled a 9 MM handgun. The complainant from the original robbery identified both suspects as two of the three males that had robbed her.
