11/14/12

On 11/14/12, at approximately 7:38 P.M., two uniform officers and one plainclothes officer responded to a radio call in the 3400 block N. Braddock Street, for a report of a shooting. A male suspect had just shot a female in the left shoulder. When the officers arrived on location the female was lying on the sidewalk outside the residence. Several people yelled that the offender who shot her was inside a house. The officers then observed the offender in the vestibule area of the residence with a gun in his hand. The officers moved away from the front door area and the offender came to the doorway with a handgun pointed toward the officers. The three officers fired their weapons and the offender retreated into the house. SWAT officers subsequently entered the property and found the offender lying on the floor in the living room. The officers brought him outside and Fire Rescue pronounced him at the scene. The female shooting victim was transported to Temple University Hospital by Fire Rescue.

The offender's firearm, an unloaded 9MM semi-automatic pistol, was recovered inside the living room.
